YATES SPEC PAK

PRODUCT OVERVIEW

The Yates Spec Pak sets the standard for patient packaging in confined spaces. It packages, protects and lifts a patient in one system, combining the immobilization of a short backboard with the support of a full-body harness. Certified to NFPA 2500 as a class III Victim Extrication Device makes it suitable for vertical lifting. Made in the USA.

KEY FEATURES

- Sliding cervical attachment stabilizes the neck and moves in line during vertical lifts
- All aluminum hardware is non-sparking, intrinsically safe for use in hazardous atmospheres
- Color coded straps for ease of identification
- Included leg slings are independently adjustable to allow proper patient packaging.
- Fully integrated handcuffs for efficient patient packaging
- HDPE Skid plate slides smoothly through tight spaces and resists wear
- Fits a 28"-54" waist and is rated to 320 lb
- 75 kg grab handles
- Includes Scannable NFC chip for fast inspections and equipment tracking
- Includes: Load Rated Carrying bag, lifting bridle, (2) pillow blocks, (2) head straps
- Skid plate, backboard and waist strap are replaceable if worn or damaged
- Made in the USA
